

APAC Opensource Transition Resources

1. Introduction

An open collection of transition-related resources maintained by the Red Hat Pride Community. Contributions welcome!

2. What is this?

A gender transition is a difficult and confusing process and finding vital resources can be even harder. In addition to the social, medical, personal, and interpersonal issues transitions can present, legal and practical changes are often frustrating, obtuse, and overwhelming. To help, we've created an open source documentation project: The Open Source Transition Resource List. The purpose is to provide clear and easy access to information such as: how to legally change your name, how to navigate changes for various online tools, communities, and networks and how to find local and regional specific instruction. It is our belief at Red Hat that the power of community can make a profound impact on its individual members. And the hope for this project is that those who come after us can transition gracefully and with great ease. Thank you for reading, learning, and helping us achieve this. Please consider contributing!

Allie DeVolder

Appendix C: How to Contribute

C.1. Suggesting edits online

If you think of something that can be added but don't want to get into editing docs, you can submit a suggested edit as a GitHub "issue", and one the maintainers will update the code and PDFs. You will need a free GitHub account to make suggestions.

You can quickly create a new suggestion by filling out the form here: <https://github.com/AshtonDavis/open-source-transition-resources/issues/new/choose> A suggestion "issue" is basically just an email. Please give your suggestion a title and describe how the content can be improved in the larger comment box.

C.2. Request GitHub Project Access

Send an email to OpenSource Transition Resources Project mailing list (ccs-mod-docs@redhat.com) asking nicely to be given access to OpenSource Transition Resources Project on GitHub. Please give us your GitHub username and use the following subject line: REQUESTING ACCESS.

C.3. Pre-requisites

STEP 1 - AsciiDoc and Hugo

Install AsciiDoc and AsciiDoctor, the guide is written in asciidoc and published using AsciiDoctor and AsciiDoctor-pdf

C.4. Configuring a Local Copy

STEP 1 - Clone the GitHub project locally:

```
git clone git@github.com:AshtonDavis/open-source-transition-resources.git
```

STEP 2 - Verify the GitHub project status:

```
cd open-source-transition-resources  
git status
```

STEP 3 - Enable the submodules, for the website theme

```
git submodule init  
git submodule update
```

C.5. Contributing Changes

STEP 1 - Create a new branch:

```
git checkout -b <new_branch_name>
```

Example:

```
git checkout -b new_edits
```

STEP 2 - Add content or make edits.

STEP 3 - Add and commit your changes:

```
git add <path_to_file>  
git commit -m "<place_your_comments_here>"
```

Example:

```
git add index.adoc  
git commit -m -s "Updated the index.adoc file"
```

STEP 4 - Push changes to the remote GitHub repository:

```
git push origin <new_branch_name>
```

Example:

```
git push origin new_edits
```

STEP 5 - Create a new pull request from the GitHub web interface.

STEP 6 - Everyone on the project team will review the merge request and add comments in GitHub. This review process will be open for one week from the day the merge request was submitted. If the merge request is still being actively discussed beyond the one week timeframe, then the merge request will stay open. Once the merge request discussion is resolved, the merge request will be NACK'd or ACK'd based on the comments given. If no comments are given after a week, then the merge request will be ACK'd.

C.5.1. Configuring the Build Environment

You can build the book locally using [AsciiDoctor](<http://asciidoctor.org/docs/#get-started-with-asciidoctor>).

C.6. Building the PDF's

To build and view the document locally, run the following script:

```
$ publish.sh
```

Alternatively, if you use VS Code, you can build the HTML from the "Run Menu". This will build the source docs list along with country specific docs. They are automatically placed under the website/static/guide folder. The website will link to the source pdf or the html version. Country specific pages will be available under a download link off the main page of the site.
